

NJ.1122_{F1}

Rutgers University- Vilmorin exclusivity - Green

- 100% Male
- High production potential

DESCRIPTION

PLANT

- Tall and open with strong disease resistance
- High branching

SPEARS

- Cylindrical, straight
- Tight tips, even in hot weather
- Medium diameter

HARVEST

- Particularly suitable for green spears
- Very high yield potential

ADAPTATION

- Versatile, low risk in any climate, soil or system

RESISTANCES

- HR: Rust
- IR: Fusarium crown and root rot

HR: High Resistance - IR: Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
