

SEQUOIA F1 (NJ1113)

Rutgers University- Vilmorin exclusivity - Green

- Hybrid - 100% Male
- High production

DESCRIPTION

PLANT

- Tall and open
- Strong disease resistance
- High branching

SPEARS

- Cylindrical and straight
- Tight tips (even in hot weather)
- Medium to jumbo size

HARVEST

- Particularly suitable for green
- Very high yield potential

ADAPTATION

- Versatile variety
- Low risk in any climate, soil or growing system
-

RESISTANCES

HR: Rust

IR: Fusarium crown and root rot

HR: High Resistance - IR: Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
