- Semi early variety (Booster + 2 days)

Grading(%)	5 – 6,5 mm	6,5 – 8mm
Northern France / Benelux	70	30
Southern France	80	20

\* HR: High / standard Resistance – IR: Moderate / Intermediate Resistance

Genetic resistances do not exempt prophylactic or phytosanitary treatments to be used in addition. The advices, suggestions, vegetation cycles and earliness are only indicative; they are the result of our observations. They could neither make up contract obligations, nor contain a harvest and/or result guarantee. The result of the crop also depends on other factors than seeds.
