

**SNAP BEAN, Hand Harvest, RUST AND BLIGHT RESISTANT**

**VANILLA  
(EX 1837-07)**

Vilmorin variety

GOURMET bean,  
Production of Very Fine pods (Sieve 2-3)  
sub-tropical areas,  
High rust and blight Resistance,  
Hand picking, fresh market.

**DESCRIPTION**

➔ <b>TYPE</b>	Dwarf green bean producing very fine pods (60% between 6,5 & 8 mm). Sieves 2-3.
➔ <b>SEED</b>	White color ; thousand seed weight around 180-200 grams,
➔ <b>PLANT</b>	<b>Very healthy plant</b> ; erected plant with good <b>architecture favouring the hand picking</b>
➔ <b>FLOWER</b>	White color
➔ <b>POD</b>	Good pod quality: round section, straight, smooth, fleshy without seed appearance, Average length : 13-14 cm at the 6.5-8 mm diameter Without string and parchment
➔ <b>HARVEST</b>	Manual

**RESISTANCES**

**HR** : BCMV, Ua, Psp  
**IR** : Xap

**MAIN ADVANTAGES**

Very healthy plant, well adapted to the hand picking.  
High production potential.  
Blight and rust resistances.

*The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.*
