

MV 0981-11

VILMORIN VARIETY

Very fine green bean, very flexible at harvest with outstanding yield

FEATURES

- Semi upright habit, open plant
- Average height 40-45 cm
- Good vigour at emergence stage
- White flower
- Pod: straight, rather long, round section, fleshy, without string nor parchment
- Medium green pod colour at fresh stage and after cooking
- Length : between 11,5 and 12 cm at the very fine sieve size
- Well concentrated in the very fine sieve size

DISEASE RESISTANCES *

- HR (*) : Bean Common Mosaic Virus (BCMV)
- IR (*) : Halo blight (Psp)
- HR (*) : Anthracnosis (CI)
- HR (*) : Common blight (Xap)

EARLINESS

- Semi early variety
- Booster +2 days

Research trials in Arras (2011 to 2013)

Grading (%)	5 – 6,5 mm	6,5 – 8mm	8 – 9 mm
Northern France Benelux	10	65	25
Southern France	10	70	20

* **HR: High / standard Resistance – IR: Moderate / Intermediate Resistance**

Genetic resistances do not exempt prophylactic or phytosanitary treatments to be used in addition. The advices, suggestions, vegetation cycles and earliness are only indicative; they are the result of our observations. They could neither make up contract obligations, nor contain a harvest and/or result guarantee. The result of the crop also depends on other factors than seeds.
