

DENALI F1 (ex VH133)

Vilmorin Variety

**Main season Imperator,
Slicing and cello, Uniform and good root quality**

FOLIAGE

- Erected habit with a strong attachment,

ROOT

- Long, cylindrical to slightly tapered shape with rounded shoulders,
- Uniform roots size,
- Length: 10 inches (25-26cm),
- Diameter: 1 inch (2.5cm),
- Very smooth,
- Excellent color: improved orange internal and external color, small core and well colored,
- Good texture,

The root size (length and diameter) depends on the sowing population.

EARLINESS

- Intermediate maturity,
In the mid-West, recommended for sowing in May for harvesting in September.

HR : High Resistance - IR : Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
