

DIAMENTO F1

Vilmorin Variety

Jumbo carrot for fresh and processing,
Very good root quality,
Strong disease resistances,

FOLIAGE

- Healthy and erected with a strong attachment,
- Good aptitude to late harvest by top lifting,

ROOT

- Cylindrico-conical shape, rather broad shoulders,
- Well rounded tip at maturity,
- Average size: length: 7 inches (18 cm), diameter: 2 inches (5 cm),
- Good root quality:
 - o Smooth, excellent external and internal color,
 - o Roots well buried in soil (no green shoulders)

The root size (length and diameter) depends on the sowing population.

RESISTANCES

- HR: Alternaria, powdery mildew,
- IR: Cavity spot, silvering, frost

EARLINESS

- Medium late, maturity 125-130 days after sowing

HR : High Resistance - IR : Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
