

GOLD NUGGET F1

Vilmorin Variety

Yellow Nantes carrot for the main season,

Sweet taste,

Very uniform, High production,

FOLIAGE

- Medium vigor, erected with a strong attachment, good aptitude for harvesting by top lifting,
- Very good tolerance to bolting,

ROOT

- Cylindrical shouldered shape,
- Light yellow color,
- Very good root quality:
 - o Uniform size and shape,
 - o Smooth and well-rounded tips at maturity,
 - o Small core,
 - o Average length: 7"5 - 8" (19-20 cm),
 - o Average diameter: 1"5 - 1"75 (3.8- 4.3 cm),
 - o Uniform color external and internal,

The root size (length and diameter) depends on the sowing population.

EARLINESS

- Medium early, maturity after 120-130 days from sowing,

HR : High Resistance - IR : Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
