

# MELODIO F1

## Vilmorin Variety

**Nantes carrot for the main season, Good storage aptitude,  
Potential to produce large root, High marketable yield,  
Good tolerance to cracking due to mechanical shocks,**

### FOLIAGE

- Healthy, upright habit,
- Strong attachment, good aptitude to harvest by top lifting,

### ROOT

- Cylindrical shape with wider shoulders, well-rounded tips at maturity,
- Average length: 7"1/2 - 8" (19-20 cm),
- Average diameter: 1"3/4 – 1"80 (4.5 cm),
- Good color, external and internal,
- Well buried in soil, good tolerance to first frosts,
- Good storage aptitude in soil and in cold room,
- High tolerance to mechanical shocks (less breakage and less splitting)

*The root size (length and diameter) depends on the sowing population.*

### EARLINESS

- Medium late, maturity after 120-130 days from sowing,

### RESISTANCES

- HR: Powdery mildew

*HR : High Resistance - IR : Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.*
