

HYBRID CARROT

PRESTO F1
VILMORIN®

• **KEY MARKET FEATURES**

- Uniform, cylindrical roots
- Early yield potential, suitable for jumbos

TYPE	Hybrid Nantes
FOLIAGE	Upright, dark green, full
ROOTS	Cylindrical with slight taper Avg 7 to 9 inch length Good weight to tip, blunt finish Smooth Consistent core to coretex color
MATURITY	Very early

CULTURAL:

Despite vigorous and full foliage, PRESTO'S tops are sensitive to *Alternaria*. Spraying with the appropriate fungicide is recommended.

ADAPTATION:

PRESTO'S very early maturity and fast sizing is ideal for the earliest spring sowings. It adapted to the fresh market segment.

The results obtained can depend on the variety and on the quality of the seeds, and also on environmental factors which are difficult or impossible to appraise. The guidelines above are given for advise only.
