

SPEEDO F1

Vilmorin Variety

Early Nantes,

Very good root quality, very uniform, smooth.

FOLIAGE

- Erected with a good attachment,
- Good aptitude for top lifting,

ROOT

- Uniform with a very cylindrical shape,
- Very smooth,
- Well rounded tip at maturity,
- Average size:
 - Length: 7-8 inches (18-20 cm),
 - Diameter: 1-1.5 inch (3-3.5 cm),
- Good color external and internal,

The root size (length and diameter) depends on the sowing population.

RESISTANCES

- IR: *Alternaria dauci* and *Cercospora carotae*

Good tolerance to premature bolting

EARLINESS

- Very early, maturity 90 days after sowing, according to local conditions.

HR : High Resistance - IR : Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
