

CLYDESDALE F1 (AD.6003)

White- Self Wrapping

- 80-85 days, uniform, and very well wrapped curd
- Well grouped harvest

DESCRIPTION

TYPE

- Hybrid cauliflower for early fall and fall harvest

PLANT

- Medium to strong plant vigor
- Medium to large frame
- Excellent self-wrapping

CURD

- White, and very well wrapped
- Medium to high dome shape

HARVEST

- Maturity: 80-85 days after transplant (according to the growing period and conditions)
- Well grouped maturity, harvest with 2 – 3 cuts

HR: High Resistance - IR: Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
