

NADIA_{F1}

Medium- Thick - Purple

- The reference for open field crops
- Vigorous plant, high marketable yield
- Good fruit quality: Dark and glossy

DESCRIPTION

PLANT

- Very versatile with strong plant vigor, providing a good canopy
- Short internodes

FRUIT

- Excellent fruit quality and steady shape and size
- Average length: 7"- 8" (18 - 20 cm)
- Average bottom diameter: 3 1/4"- 4 3/4" (8 - 12 cm)
- Average weight: 10 – 11 oz. (300 – 350 grams)
- Well rounded tips
- Deep black color and shiny
- Very firm at harvest for a good shelf life

Fruit size depends on harvesting stage

HARVEST

- Medium earliness
- Good fruit setting allowing a high production

HR: High Resistance - IR: Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
