

# GOLDEN BOY F1 (SSC.2997)

## Short Day Yellow- Onion

- High tolerance to Downy Mildew

### DESCRIPTION

#### DESCRIPTION

- Bulbs are flattened-round with yellowish-brown skins
- Average weight: 250-300 grams each
- Maintains healthy tops and a strong neck though its production cycle
- Dry bulbs have medium storage capacity

#### OTHER

- Recommended: for 32 degree latitude areas
- Can be harvested young for green onion market or can be harvested at full maturity and marketed as a sweet onion

HR: High Resistance - IR: Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
