

Jalapeños - Hot Pepper

NEW !

Tamayo F1 (exp. VIL 901)

Very early hybrid, high concentrate yield with uniform and dark fruit. **Tamayo** is perfect for short cycle market looking for big fruit size. Resistant to BLS races 1,2 and 3.

SWEET !

Caramelo F1 (exp. VIL 4204)

Caramelo is a reduced pungency hybrid. With a vigorous plant and good cover, it produces large fruits with a high yield potential. **Caramelo** is ideal for the processing market and carries resistance to BLS races 1, 2, and 3.

Da Vinci F1 (exp. VIL 342)

Da Vinci is a variety with large fruits, smooth and dark green, and without anthocyanine accumulation. It has excellent uniformity in shape and size, high yield potential and resistance to BLS races 1, 2, and 3.

Monet F1 (exp. VIL 4253)

Monet is a high yielding variety, with medium size fruits, dark green and smooth. Very easy to decap, which makes it an ideal variety for the processing market. **Monet** is resistant to BLS races 1, 2, and 3.

Orozco F1 (exp. VIL 213)

Orozco is a hybrid jalapeño with high yield potential. It produces large fruits, smooth and dark green, with great uniformity in shape and size. It does not accumulate anthocyanine. Recommended for areas with very low pressure of BLS.

Rivera F1 (exp. VIL 346)

Rivera produces large fruits, very smooth and dark green, with no accumulation of anthocyanine. This hybrid also shows an excellent uniformity in shape and size and is resistant to BLS races 1, 2, and 3.
