- Early and concentrated fruit setting
- Good setting in hot and cold conditions

FRUIT

- Green / Red sweet blocky type
- Very homogeneous fruits
- Average 4 lobes
- Average size: 15cm- 10 cm
- Dark green and shiny color
- Very smooth fruit

OTHER

- HR: TMV
- Recommendations: Fertilization adaptation is recommended to improve plant growth

HR: High Resistance - IR: Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
