

SCIALARI F1 (VG.48)

Indeterminate Cherry Type

- Harvest on vine or single, good level of resistance to TYLCV
- Suitable for season crops and for counter-season production under shelter

DESCRIPTION

PLANT

- Medium vigor, short internodes
- Good level of resistance to TYLCV
- Healthy foliage with good tolerance to leaf diseases
- Adapted to long cycle

FRUIT

- Elegant and open sepals
- Average weight: 15-20 grams
- Good fruit setting at high temperature
- High yield for full crops cycle
- Mid-early
- Good fruit quality:
 - ✓ Smooth and well filled fruit
 - ✓ Firm and crispy flesh and good taste
 - ✓ High tolerance to fruit cracking

OTHER

- HR: ToMV, V:0 ; Fol: 1,2, TYLCV
- IR: M

HR : High Resistance - IR : Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
