➤ TYPE	Cherry
➤ PLANT	Indeterminate plant Medium vigour, short internodes Good fruit setting at high temperature High yield all along the crop Good level of resistance to TYLCV For counter-season production under shelter Adapted to long cycle
➤ FRUIT	Around 15-20 grams fruit, round shape Elegant and open sepals Compact cluster, with 14-16 fruits and a fishbone shape Good fruit quality: <ul style="list-style-type: none"> ○ smooth and well filled fruit, ○ firm and crispy flesh and good taste ○ high tolerance to fruit cracking
➤ EARLINESS	Mid-early

RESISTANCES

HR : ToMV, V:0, Fol:0,1
IR : M, TYLCV

TECHNICAL RECOMMENDATIONS

The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
