

# MANOLINE F1 (H.3159)

## Yellow Witloof Chicory

- **Tolerance to Safari / Cursus herbicides**
- **Early to normal forcing**

### DESCRIPTION

#### PLANT

- **Mid-upright habit**
- **Medium vigor**
- **Very green full leaves**

#### WITLOOF

- **Average length**
- **Cylindrical shape, mid-pointed head, well covered, dense**
- **Thick and smooth leaves, well colored**
- 

#### EARLINESS

- **Field: Early (to be checked in your local conditions)**
- **Forcing: Mainly from October to January**

#### OTHER

- **High yield to forcing roots**
- **High yield in extra quality**
- **Less susceptible to brown core**
- **Good shelf life after harvesting**

HR : High Resistance - IR : Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
