- Very uniform

#### EARLINESS

- Field: Intermediate (maturity after 150 days)
- Forcing: Mainly from mid-November to March (in Europe)

#### OTHER

- High production and number of forcing roots
- High % of heads with great quality

HR : High Resistance - IR : Intermediate Resistance. The genetic resistances are not dispensed from prophylactic measures to be used as an addition. Our recommendations, suggestions, growing cycles and maturity information are only indicative and based on our own observations and our general experience. They are not contractual and they do not necessarily imply a successful harvest and/or result. The success of the cultivation also depends on factors non-related with the seed.
